

CPS - Cheque Payment Software

Paystation's CPS is a powerful software application that provides businesses with savings, in both time and money, in a simple and secure process for cheque production. Small to mid-size companies need the benefits of both fraud protection and increased efficiencies Together in a cost effective solution.

CPS has a significant number of installations with both national and international organizations. Whether you are looking for cheque automation, advanced fraud protection or simply the ability to print on blank cheque stock - CPS delivers these and many other options.

You can be assured that regardless of the size of your operation, CPS can be installed with any Windows® based accounting application. There is no need to modify your existing hardware, software or accounting practices.

CPS is a robust and proven solution, backed by Paystation's 65 years of experience in providing technology solutions for businesses and financial institutions. Paystation can help you increase security, save cost, and save your time.
