DIGITAL CHECK
TELLERSCAN® TS240

TELLERSCAN TS240

Fast, quiet and reliable, the TellerScan® TS240 isDigital Check's flagship batch-fed cheque scanner for teller capture and branch capture systems.

With a 100-item feeder and speeds of up to 150 documents per minute, it's powerful enough to handle high-volume scanning at the branch back counter while maintaining a small enough footprint for use at the teller window.

Digital Check also incorporated diagnostics into the scanner to allow users and help desks to quickly isolate problems. The cameras hold cheques away from the lens, so dirt does not accumulate and operators aren't required to clean them as often. Images are captured in full colour under white balanced light to maximize image quality, making even the pastel colors of gel pens readable.

Key features and benefits:

- Available in speeds of 50, 75, 100 or 150 DPM
- Up to 100-item feeder and exit pocket capacity
- Special Document Handling to clean up difficult images

- Built-in diagnostics
- Single-line or up to four-line endorsement
- Easy setup with no assembly required
- Compatible with Windows® XP/Vista/7/8.x/10

Paystation is a leading Canadian Payments Technology Company established in 1955. We have been a payment solution provider for Businesses and Financial Institutions for over 65 years, with offices and representatives across Canada. Together with our partners, we offer a broad span of payment technology solutions that will fit your growing needs, from cheque scanners and payment solutions to electronic/image-based payment solutions.
